

# YETI - EXPLORER

Unique Long Range - GlobeMaster 50 LRX Explorer - for sale

## Range and efficiency:

YETI - Explorer is designed to travel long distances without the need for frequent refuelling.

The lightweight aluminum hull helps to increase the vessel's range and efficiency, reducing fuel consumption and operating costs.

## Unbelievable range:

Having transatlantic capability, she also easily travels to countries or far places with more favourable fuelling costs, increasing the value even more for any owner.

## Durability & strength:

Aluminum is a durable and strong material that is well-suited for use in long-range explorer vessels. It can withstand the harsh marine environment, including saltwater, extreme temperatures, and rough seas.

This durability and strength also contribute to the vessel's longevity and value.

## Seaworthiness:

The semi-displacement hull design provides excellent stability and seakeeping ability, which is important for extended voyages in open seas.

The use of aluminum in the hull construction, added with full insulation on the inside, dampen vibrations and noise, and contributes to a more comfortable and enjoyable journey.

## Design Focus

YETI - Explorer stands out as a meticulously equipped liveaboard explorer yacht and represents lots of innovative solutions and new thinking in a Scandinavian style.

This semi-custom vessel offers a high degree of customisation, design features and specifications, layout, materials, and equipment, to fit specific needs and preferences.

The primary design focus is for those interested in "Long Range Exploring", but can also be a personal family cruiser, "a private hideaway", mobile office or your permanent home.

The design philosophy has been to be able to create a different boating life and try to maintain an as favorable environmental profile as possible within the framework of the design specifications.

Embark on the ultimate journey of sustainable yachting powered by self-sufficient solar and wind energy.

This boat sets a new standard in eco-friendly luxury.

## Maintenance:

Meticulously efforts have ben put on making the Maintenance an absolute ease for the owner.

Technical systems and materials have carefully ben chosen by experienced professionals for longevity, ease of reach and ease of replacement.

The Ice-going antifoul bottom paint technology is a massive breakthrough in the field of underwater ship hull performance and protection. It will probably never need replacement during its lifetime.

The electrical systems and separate electrical central station room is a chapter of its own, which would need its own review.

## Resale Value:

Four GlobeMaster 50 have already been built. This meticulously equipped newly built well designed and well maintained aluminum long-range explorer vessel, with exceptional high quality in the welding, has a high resale value, making it a smarter investment for any owner.

YETI - Explorer embodies a perfect balance of form and function, resulting in unique and breathtaking vessels that leave a lasting impression.

She is more than just a vessel, she is a gateway to, exploration, memories, new friendships and unforgettable adventures.

She can be found for sale at Devalk Yacht Sales - Amsterdam.

## Living Comfort - Space

Insulated and prepared for both cold Scandinavian and warm Mediterranean cruising grounds, sleeping 6 + 2, added with two separate hidden private workstations, this quiet spacious and uniquely well laid out yacht has enormous interior living comfort, and 360 degree views from almost anywhere onboard.

All windows can separately be toned down, both to keep you privacy and block out any sun rays. A separate 24/7 ventilation system will always keep the boat well ventilated and fresh.

To satisfy almost any gourmet chef and guests, the very well equipped and unusual practically designed galley alone, will make any meal a joy to experience.

## Security

Bringing your family and friends on board cruising, represents for most, the highest value to preserve safe.

Watertight bulkheads, all outlets securely placed above the waterline and doubled emergency pumps at every station with multiple functions, will keep any captain calm.

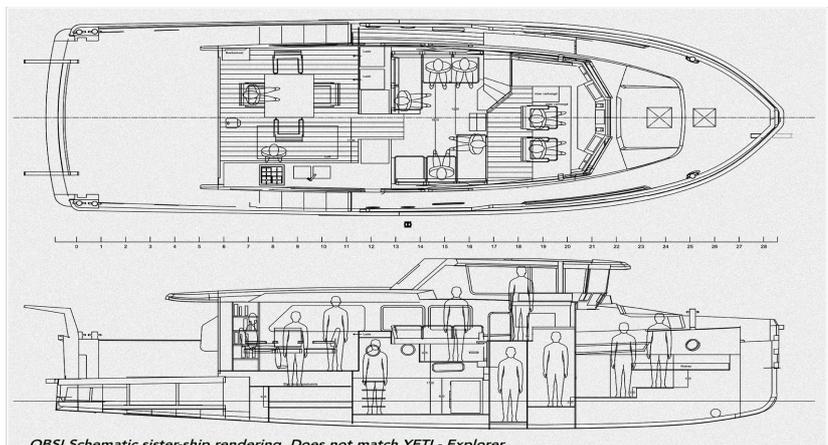

A life-raft, and a double tender arrangement rises the security planning even more.

Despite more precise modern weather forecasting, unpredictable weather poses hazards to vessels and voyage scheduling. Climate change worsens these risks. To mitigate potential threats, additional measures are needed, made possible by digital technology advancements to manage risks and increase safety.

YETI - Explorer is therefore equipped with the highest technology solution in lightning protection for boats.

The technology is based on a principle of Nikola Tesla, and thanks to this technology, crew and passengers will be able to enjoy the sailing experience without worrying about being hit by lightning strikes.

This unique installation can also reduce your insurance cost.
